Globalistihdam

COMPANY PROFILE

International advisory and project coordination.

Research, advice and coordination for business and individual requirements.

Recruitment · International education
Investment · Robotics

globalistihdam.com

OUR APPROACH

Research, advice and coordination.

Globalistihdam advises businesses on workforce, investment and technology requirements, and individuals on career and education plans. Each engagement is assessed in the context of its target country, current circumstances and service requirements.

Our mission

To assess needs, options and process requirements together. To support business and individual decisions through research and advice, and coordinate applications, discussions and project activities within a defined service scope.

Our vision

To develop an international network connecting people, education, investment and technology. We welcome joint projects, representation arrangements and strategic partnerships with businesses, universities, industry organisations, technology providers and entrepreneurs. We are open to all forms of cooperation that contribute to our service areas.

The service scope, responsibilities and timetable are defined separately for each engagement.

SERVICE AREAS

Recruitment and international education

01

Jobseekers are not charged for recruitment and placement services.

Recruitment

Employers and candidates

Assessment of workforce requirements alongside candidate experience and skills.

OUR WORKING PRINCIPLES

Our working principles

01 Relevant service scope

Services defined around objectives and current circumstances.

02 Evidence-based assessment

Research considers source quality, dates and local conditions.

03 Clear responsibilities

Clarity on roles, expected deliverables and the timetable.

04 Balanced options

Benefits, cost, suitability and implementation assessed together.

05 Coordination across disciplines

Information and discussions organised around the engagement.

06 Consistent follow-through

Agreed activities and outstanding information are tracked.

Our working model

01

Initial assessment

Objectives, country, project stage and requirements.

02

Engagement agreement

Scope, deliverables, responsibilities and timetable.

03

Coordination

Follow-up on documents, discussions and project activities.
